What is a Microboard?

A Microboard is a formalized “circle of support,” a non-profit corporation consisting of a small group of individuals who assist an individual with disabilities in creating and implementing a life plan.

A Microboard starts with person centered planning and uses a self-determined model to develop and expand community connections.

Guest Speaker

Join us as we welcome Monica Mann, Director of Family Services at Eli’s Village, to learn more about Microboards, how to create one, and the various supports available in Virginia.
